1 The United States hereby files its Opposition to Defendant Bennie Powell Jr.'s Motion to Suppress
 2 ("Mot."). (Dkt. 84). This Opposition is based upon the files and records of the case together with the
 3 following statement of facts and memorandum of points and authorities.

4 **INTRODUCTION**

5 On November 21, 2019, California Superior Court Judge Tim Kam, a neutral and detached official,
 6 issued a warrant to search Defendant's home, vehicles, person, and electronic devices after reaching an
 7 independent judgment that the facts and opinions set forth in Postal Inspector Singh's affidavit
 8 established a fair probability that evidence, fruits, contraband, and instrumentalities of forgery,
 9 possession of stolen property, and other criminal offenses would be found in those locations. In
 10 challenging probable cause, Defendant fails to employ "the principles of *Gates*-practicality, common
 11 sense, a fluid and nontechnical conception of probable cause, and deference to the magistrate's
 12 determination." *United States v. Adjani*, 452 F.3d 1140, 1145 (9th Cir. 2006).

13 Defendant's first set of arguments attempt to create issues in the affidavit where none exist. He
 14 attacks the affiant's determination that the five postal money orders that the Defendant negotiated at
 15 Westamerica Bank were "counterfeit" as "conclusory allegations and conjecture" when, in fact, the
 16 affidavit described in detail not only the transactions in question, but the source of that information.
 17 Next, Defendant dismisses reports from the bank's loss investigators and the U.S. Postal Service Money
 18 Order Verification Unit as "conclusory allegations [...] made by unsworn third parties about whom the
 19 judge knew absolutely nothing except their name or title." Mot. at 5. He demands that an unreasonable
 20 level of scrutiny, typically reserved for confidential criminal informants, apply to information provided
 21 by the victim bank's employees (whose job is to investigate fraudulent transactions) and a component of
 22 the United States Postal Service (that is specifically tasked with checking suspicious money orders). His
 23 other allegation—that the "any vehicles" provision is overly broad—discounts the role that common
 24 sense plays in drawing reasonable inferences about where evidence of counterfeiting and identity theft
 25 are likely to be located and the value of an experienced agent's opinions based on training and
 26 experience.

27 His second set of arguments fare no better. Even the broadest categories of items that the
 28 warrant authorized to search and seize were limited by reference to specific criminal activities and a

1 three-month time period. Furthermore, the affidavit, which was attached to and incorporated in the
2 warrant, provided sufficient guidance that appropriately limited the executing officers' discretion in
3 identifying the items to be searched and seized.

4 Finally, even if the Court finds there was not a substantial basis to support a finding of probable
5 cause, it should still deny the motion because the execution of the warrant falls within the good faith
6 exception.

7 FACTUAL BACKGROUND

8 On November 15, 2019, Donna Cory, a Loss Investigator at Westamerica Bank, contacted Postal
9 Inspector Tyler Sherman about five counterfeit U.S. Postal Service money orders, each in the amount of
10 \$1,000, that an individual negotiated at Westamerica Bank's Vallejo branch on the previous day. On
11 November 18, 2019, Loss Investigator Cory emailed images of the individual who had negotiated the
12 counterfeit money orders and copies of the five counterfeit money orders to Inspector Sherman. The
13 images were still shots taken from the Westamerica Vallejo branch's surveillance video footage on
14 November 14, 2019.

15 Loss Investigator Cory explained to Inspector Sherman that she had called the U.S. Postal
16 Service Money Order Verification Unit and was told that the five money orders that the individual had
17 negotiated were not valid. Cory sent the serial numbers of the five money orders to the Verification
18 Unit.

19 On November 19, Postal Inspector Sherman spoke with Tammira Day, another Loss Investigator
20 at Westamerica Bank. This time, Loss Investigator Day told Inspector Sherman that the same individual
21 who had transacted the counterfeit money orders at the bank's Vallejo branch also tried to cash three
22 additional money orders at the bank's Fairfield branch, and emailed him two images of the individual
23 taken from the Fairfield branch's surveillance video footage. She also informed him that Westamerica
24 Bank had incurred a \$5,000 loss as a result of these transactions. Day gave Sherman the personal
25 identifying information that the individual supplied on his bank account application, including his
26 purported name, "Timothy Sears," and an address of "1001 Spyglass Parkway, Vallejo, CA 94591."

27
28

1 Postal Inspector Sherman compared the surveillance footage images from Vallejo branch and
 2 Fairfield branch and determined that it was the same individual who cashed or attempted to cash the
 3 postal money orders on both occasions.

4 On November 19, 2019, Inspector Sherman conducted follow-up investigation. He spoke with
 5 the property manager at 1 Spyglass Parkway, who positively identified the individual shown in one of
 6 the bank images as an individual, Timothy Sears, who lived in the complex. Sherman also researched
 7 postal indices and found that “Timothy M. Sears” was receiving mail at 1001 Spyglass Parkway.

8 Based on the facts recited above, Postal Inspector Singh drafted a search warrant affidavit.

9 ARGUMENT

10 I. The Search Warrant Affidavit Established Probable Cause

11 The Fourth Amendment provides that “no warrants shall issue, but upon probable cause,
 12 supported by oath or affirmation, particularly describing the place to be searched, and the persons or
 13 things to be seized.” U.S. Const. Amend. IV. This showing requires only a “fair probability, not
 14 certainty,” that the items sought are contraband, fruits, or evidence of crime, and that they are now at the
 15 location to be searched. *United States v. Krupa*, 658 F.3d 1174, 1177 (9th Cir. 2011). Moreover,
 16 whether an affidavit in support of a search warrant shows probable cause should be considered under the
 17 “totality of the circumstances.” *Illinois v. Gates*, 462 U.S. 213 (1983). “[P]iece-meal analysis” is
 18 therefore “contrary to the standard articulated in *Gates*.” *United States v. Farias*, No. CR 11-00647 RS,
 19 2012 WL 12888370, at *3 (N.D. Cal. Nov. 20, 2012), *aff’d sub nom. United States v. Farias-Sanchez*,
 20 585 F. App’x 551 (9th Cir. 2014).

21 When considering whether the magistrate had a substantial basis to conclude that the warrant
 22 was supported by probable cause, the reviewing court should give “great deference” to a magistrate’s
 23 probable cause determination. *United States v. Bohannon*, No. 19-CR-00039 CRB, 2020 WL 7319430,
 24 at *6 (N.D. Cal. Dec. 22, 2020) (quoting *United States v. Schesso*, 730 F.3d 1040, 1045 (9th Cir. 2013)).
 25 Where a magistrate has found probable cause, this finding should “not be reversed absent a finding of
 26 clear error.” *United States v. Pitts*, 6 F.3d 1366, 1369 (9th Cir. 1993). “Although in a particular case it
 27 may not be easy to determine when an affidavit demonstrates the existence of probable cause, the
 28 resolution of doubtful or marginal cases in this area should be largely determined by the preference to be

1 accorded to warrants.” *United States v. Ventresca*, 380 U.S. 102, 109 (1965); *see also United States v.*
 2 *Crews*, 502 F.3d 1130, 1135 (9th Cir. 2007) (“In borderline cases, preference will be accorded to
 3 warrants and to the decision of the magistrate issuing it.”).

4 As set forth below, the search warrant here was supported by probable cause because the
 5 affidavit established a “fair probability” that the alleged crime(s) of forgery and possession of stolen
 6 property had been committed, and contraband or evidence of these crimes were located at the 1001
 7 Spyglass Parkway (the “Residence”), the white or silver BMW and any other vehicles associated with
 8 the Residence, and computers, cell phones and other electronic media devices found at the Residence.

9 **A. The Search Warrant Affidavit Set Forth a Fair Probability that the Alleged Crimes
 10 of Forgery and Possession of Stolen Property Had Been Committed.**

11 As an initial matter, to justify the issuance of a warrant, an affidavit need only contain facts that
 12 indicate a fair probability that evidence of at least one of the alleged crimes in the affidavit will be
 13 located in the place to be searched. *See United States v. Abboud*, 438 F.3d 554 (6th Cir. 2006) (where
 14 magistrate approved the warrant only with respect to bank fraud, but search warrant affidavit (which was
 15 incorporated by reference into the warrant to support the finding of probable cause) also listed additional
 16 offenses, the reviewing court limited its probable cause analysis to the bank fraud violation). For the
 17 reasons set forth below, Postal Inspector Singh’s affidavit established probable cause that the crimes of
 18 forgery and possession of stolen property were committed.

19 While the government maintains that the affidavit also supplied probable cause for identity theft
 20 and conspiracy, this response focuses on the probable cause analysis for forgery and possession of stolen
 21 property because the affidavit contains a stronger factual basis for these offenses. If the Courts find that
 22 the affidavit established probable cause for either forgery or possession of stolen property, it need not
 23 address the additional alleged offenses of identity theft and conspiracy.

24 Postal Inspector Singh’s affidavit in support of the search warrant described two separate
 25 transactions involving counterfeit postal money orders that occurred within several days of each other, at
 26 two different Westamerica Bank branches. Def. Ex. A. (Search Warrant (“SW”) Affidavit (“Aff.”)) ¶¶
 27 6-8. On November 14, 2019, the individual negotiated five counterfeit postal money orders, in the
 28 amount of \$1,000 each, at Westamerica’s Vallejo branch. *Id.* ¶ 6. Sometime between November 14 and

1 November 19, 2019, the same individual visited Westamerica's Fairfield branch and tried to cash three
 2 additional postal money orders. *Id.* ¶ 8. Westamerica Bank suffered a loss of approximately \$5,000 as a
 3 result of the foregoing transactions or attempted transactions. The affiant noted that the same individual,
 4 who identified himself as "Timothy Sears" on his bank account application, *id.* ¶ 9, negotiated or
 5 attempted to negotiate the money orders at the Vallejo branch and Fairfield branch. *Id.* ¶¶ 8-9. He also
 6 stated that this individual was captured on bank surveillance footage at both branches, and, based on his
 7 review of the images, it appeared to be the same person on both occasions. *Id.* ¶ 9.

8 Without more, Defendant's criticism that the affidavit rested heavily on "conclusory allegations
 9 and conjecture" that cannot be used to establish probable cause might have found its mark. Mot. at 4.
 10 An affidavit must recite underlying facts so that the issuing judge can draw his or her own reasonable
 11 inferences and conclusions; it is these facts that form the central basis of the probable cause
 12 determination. *Ventresca*, 380 U.S. at 108–09; *United States v. Rubio*, 727 F.2d 786, 795 (9th Cir.
 13 1983) ("The magistrate must be provided with sufficient *facts* from which he may draw the inferences
 14 and form the conclusions necessary to a determination of probable cause.") (emphasis added); *United*
 15 *States v. Dubrofsky*, 581 F.2d 208, 212 (9th Cir. 1978) ("A search warrant may not rest upon mere
 16 affirmation or belief without disclosure of supporting facts or circumstances.").

17 But Postal Inspector Singh's affidavit contained *much more*. The affidavit also described in
 18 detail how the Westamerica Bank loss investigators determined that the money orders were in fact
 19 "counterfeit" and reported the suspicious activity to law enforcement. It stated that on November 15,
 20 2019, Loss Investigator Cory contacted Postal Inspector Sherman and told him that five counterfeit
 21 postal money orders were negotiated at Westamerica's Vallejo branch the previous day. SW Aff. ¶ 6.
 22 Sometime between November 15 and November 18, Cory called the U.S. Postal Service Money Order
 23 Verification Unit, gave the serial numbers of the five suspicious counterfeit money orders, and was
 24 informed that the money orders were "not valid." *Id.* ¶ 7. On November 18, she emailed the 'evidence'
 25 she had gathered—copies of the five counterfeit money orders and surveillance video images of the
 26 individual who negotiated the money orders at the bank's Vallejo branch—to Sherman. *Id.*

27 Based on this information, Sherman continued to investigate. The affidavit states that on
 28 November 19, he spoke with Loss Investigator Day, who was the bank's investigator in this case. *Id.* ¶

1 8. Day reported that the same individual who had negotiated the five counterfeit money orders at the
 2 bank's Vallejo branch also visited the Fairfield branch and "tried to cash three (3) additional Money
 3 Orders." *Id.* She also told Sherman that Westamerica Bank had incurred approximately \$5,000 in
 4 losses due to these transactions. *Id.* Either Postal Inspector Sherman or Postal Inspector Singh
 5 examined the surveillance photos from the Fairfield branch and from the Vallejo branch, and based on
 6 this comparison, determined that the same person tried to pass the counterfeit money orders on both
 7 occasions. *Id.* The bank's surveillance footage also included an image of a white or silver BMW Sedan,
 8 which the individual drove to leave the bank on November 14. Def. Ex. A (SW Attachment ("Attach."))
 9 A).

10 The affidavit further stated that the individual submitted a Westamerica bank account application
 11 that listed his name as "Timothy Sears," his address as "1001 Spyglass Parkway, Vallejo, CA 94591," a
 12 Georgia driver's license number, a telephone number, and information about his employer. SW Aff. ¶ 9.
 13 Postal Inspector Sherman researched postal indices and confirmed that an individual named "Timothy
 14 M. Sears" was receiving mail at 1001 Spyglass Parkway. *Id.* ¶ 11. He also spoke with the property
 15 manager of the multi-apartment building in which 1001 Spyglass Parkway is located, and the property
 16 manager confirmed that the individual shown in an image from Westamerica Bank's surveillance
 17 footage lived in the complex. *Id.* ¶ 10.

18 Taken together, the affidavit contained sufficient "underlying facts" for "the issuing judge...[to]
 19 draw his or her own reasonable inferences and conclusions" that there was a fair probability that the
 20 crime of forgery had been committed. *See United States v. Underwood*, 725 F.3d 1076, 1081 (9th Cir.
 21 2013) (citing *Ventresca*, 380 U.S. at 108-09). In *United States v. Carney*, the Sixth Circuit confronted
 22 an almost identical set of facts in a search warrant affidavit and found probable cause for counterfeiting.
 23 675 F.3d 1007, 1012-13 (6th Cir. 2012). There, the affidavit described two separate transactions
 24 involving different denominations of counterfeit money that occurred in the same area and within a
 25 week of each other. *Id.* at 1012. On the first occasion, a boy and his mother reported to the police that a
 26 man later identified as Carey paid them with counterfeit bills and then drove away in a white Chevy
 27 SUV. *Id.* at 1008. The following week, a convenience store manager reported to police that Carney
 28 attempted to pass a counterfeit \$20 bill to pay for merchandise, and that he left the scene in a white

1 Chevy SUV.¹ The Sixth Circuit held that “based on the totality of the circumstances, the supporting
 2 affidavit established a fair probability that evidence of counterfeiting would be found in the apartment
 3 and car.” *Id.* at 1012.

4 In addition, the affidavit alleged facts sufficient to establish probable cause for possession of
 5 stolen property. It is undisputed that the magistrate judge was presented with the following information:
 6 (1) five counterfeit postal money orders with serial numbers 26254673932, 26254673954,
 7 26334006131, 26334006221, and 26334006074, were negotiated at Westamerica Bank, (2) the U.S.
 8 Postal Service checked these serial numbers and confirmed that the money orders were not valid, and (3)
 9 the bank sustained around \$5,000 in losses in connection with the foregoing transactions. SW Aff. ¶¶ 6-
 10 8. In the “Training and Experience” section of the affidavit, Postal Inspector Singh states that he knows
 11 “counterfeitors will often use computers or other electronic devices to design counterfeit Money Orders”
 12 and “[g]ood counterfeitors will print or produce large quantities of Money Orders and have mules or
 13 innocent subjects cash them at financial institutions.” *Id.* ¶ 12(a).

14 Based on this information, a magistrate judge could draw his or her own reasonable conclusions
 15 about how the counterfeit money orders were created and how the individual came to be in possession of
 16 them. Probable cause determinations may be based in part on reasonable inferences. *United States v.*
 17 *Davis*, 530 F.3d 1069, 1084 (9th Cir. 2008) (citing *United States v. Gourde*, 440 F.3d 1065, 1071 (9th
 18 Cir. 2006) (en banc)); *see also Gates*, 462 U.S. at 240 (noting that a magistrate judge may “draw such
 19 reasonable inferences as he will from the material supplied to him by applicants for a warrant”). The
 20 natural and reasonable inference is that a “counterfeiter” designed and printed money orders with made-
 21 up serial numbers, or the money orders were genuine U.S. Postal Service-issued money orders bearing
 22 real serial numbers that were stolen from the U.S. Postal Service (or stolen from the legitimate purchaser
 23 or recipient) and someone forged the payment information on the orders before cashing them.²

24

25 ¹ The affidavit also stated that law enforcement confirmed that Carney appeared in the store’s
 26 surveillance video. The affiant also noted that law enforcement observed the white Chevy SUV parked
 27 in front of an address that Carney’s parole officer confirmed as a known address for Carney. Finally, the
 28 affidavit stated that police drove to this address, knocked on the door, and Carney answered the door.

² Defendant attacks the affidavit for failing to establish probable cause for mail theft. *See* Mot. at 7
 (“The affidavit, however, utterly fails to establish that the man committed mail theft.”). But nowhere in
 the affidavit or supporting documents does Postal Inspector Singh make any claim that there is probable
 cause that the crime of mail theft has been committed or that evidence of mail theft may be found in the
 GOV’T OPP’N TO DEF. MOT. TO SUPPRESS

1 **B. Defendant's Arguments Challenging Probable Cause Lack Merit.**

2 Defendant presents two arguments challenging probable cause for forgery: *first*, that Loss
 3 Investigator Cory's and the U.S. Postal Service Verification Unit's determinations that the money were
 4 "counterfeit" and "not valid" cannot be used to establish probable cause; and *second*, that the magistrate
 5 judge could not rely on hearsay statements of "unsworn third parties" to find probable cause. Neither
 6 argument has merit.

7 **1. Loss Investigator Cory and USPS Verification Unit Reports Supplied
 8 "Underlying Facts" for Probable Cause Determination.**

9 Citing *United States v. Underwood* and *United States v. Cervantes*, Defendant argues that
 10 "Cory's and the Verification Unit's claims that the money orders were 'counterfeit' or 'not valid' are not
 11 supported by any underlying facts..." Mot. at 5. Nor does the affidavit explain the meaning of these
 12 terms or how the bank and U.S. Postal Service determined that the suspicious money orders were,
 13 respectively, "counterfeit" and "not valid". *Id.*

14 Defendant's allegation, while factually correct, does not undermine the probable cause finding.
 15 Courts have consistently held that an affidavit that recites reports from businesses or police about
 16 transactions involving counterfeit money or counterfeit money orders supplied probable cause to search
 17 for evidence of counterfeiting without further inquiry into how and why the bills or money orders were
 18 deemed "counterfeit." *See e.g., Carney*, 675 F.3d at 1012 (affidavit described two separate transactions
 19 involving different denominations of counterfeit money reported by convenience store manager and
 20 individuals who received counterfeit bills as payment); *United States v. Duegaw*, 150 F. App'x 803, 805
 21 (10th Cir. 2005) (search warrant affidavit stated defendant's traveling companion had attempted to cash
 22 a fraudulent money order while defendant waited outside in their car and defendant provided police with
 23 false identification established probable cause); *Rice v. United States*, 134 F. App'x 839, 840-41 (6th
 24 Cir. 2005) (affidavit that recited statement by defendant's girlfriend, who had just been caught
 25 attempting to pass a counterfeit \$50 bill at a gas station, that she had obtained counterfeit bills from him
 26 at his home was sufficient to establish probable cause).

27
 28 location to be searched.

1 Furthermore, Defendant's reliance on *Underwood* and *Cervantes* is misplaced because these
 2 cases demonstrate that only the most conclusory affidavits bereft of underlying facts will disturb a
 3 magistrate judge's finding of probable cause. In *Underwood*, the Ninth Circuit held that a state search
 4 warrant affidavit failed to provide a sufficient basis for probable cause for ecstasy trafficking where it
 5 contained the affiant's statement, “[b]ased on other seizures in the investigation, I believe the crates [that
 6 defendant delivered to co-conspirators] contained approximately 260,000 pills of MDMA.” 725 F.3d at
 7 1083. This statement was a “bare conclusion” because it provided “no underlying facts about the
 8 seizures from which the issuing judge could draw his or her own conclusion about how, if at all, the
 9 seizures indicate that the two crates contained ecstasy.” *Id.* Likewise, in *Cervantes*,³ the court afforded
 10 little if any weight to a detective's conclusory statement that, “based on [his] training and experience,” a
 11 box in defendant's possession came from a “suspected narcotics stash house.” 703 F.3d 1135, 1139-40
 12 (9th Cir. 2012) (“While Hankel's training and experience are factors to be considered, it is incumbent
 13 upon the arresting or searching officer to explain the nature of his expertise or experience and how it
 14 bears upon the facts which prompted the officer to arrest or search.”) (internal quotation marks omitted).

15 The affidavit in this case, by contrast, included detailed “underlying facts” to support Postal
 16 Inspector Singh's conclusion that the postal money orders were “counterfeit.” Instead of making a
 17 vague reference to ‘conversations with the bank’ or ‘training and experience’ as the basis for his
 18 statement, the affidavit recited what Loss Investigators Cory and Day told Inspector Sherman (an
 19 individual had cashed five counterfeit postal money orders and a few days later attempted to cash
 20 additional money orders), the steps that Cory took to verify the money orders (called the USPS Money
 21 Order Verification Unit and provided serial numbers), and noted that Postal Inspectors received copies
 22 of the suspicious money orders and surveillance footage images of the suspect. This enabled the
 23 magistrate judge to assess for himself the persuasiveness of the facts relied upon by the affiant and
 24 “draw the inferences and form the conclusions necessary to a determination of probable cause.” *See*
 25 *Underwood*, 725 F.3d at 1081 (quoting and citing *Rubio*, 727 F.3d at 795).

26
 27
 28 ³ *Cervantes* concerned a warrantless search of defendant's vehicle, but the same probable cause standard
 applied.

2. Hearsay Statements of Citizen Informants with No Motive for Fabrication Are More Reliable and Can Supply Probable Cause.

Defendant’s second contention—that the loss investigators’ statements cannot be used to establish probable cause because they are “conclusory statements” by “unsworn third parties”—fares no better. Mot. at 5-6. As a starting point, Defendant fails to state, let alone apply, the standard for assessing hearsay statements by informants. To determine whether information provided by informants establishes probable cause, a magistrate looks to the “totality of the circumstances.” *Gates*, 462 U.S. at 228. Evidence bearing on the veracity of the informant and his or her basis of knowledge is considered together with other relevant evidence in making the probable cause determination based on the totality of the circumstances. *United States v. Angulo-Lopez*, 791 F.2d 1394, 1396-97 (9th Cir. 1986) (citations omitted).

Citizen informants, while not carrying the same presumption of reliability as police officers, require less evidence to establish their veracity than criminal informants. *Angulo-Lopez*, 791 F.2d at 1397. A citizen informant’s veracity may be established by the “absence of an apparent motive to falsify and independent police corroboration of the details provided by the informant.” *Id.* (citing *United States v. Gagnon*, 635 F.2d 766, 768 (10th Cir. 1980), *cert. denied*, 451 U.S. 1018 (1981) and *Rutherford v. Cupp*, 508 F.2d 122, 123 (9th Cir. 1974), *cert. denied*, 421 U.S. 933 (1975)).

Defendant’s allegation that the magistrate judge lacked information to assess the reliability of Loss Investigator Cory’s statements is contradicted by the facts. First, as a citizen informant, she had “no ulterior motive for providing false information,” *Gagnon*, 635 F.2d at 768. To the contrary, as a loss investigator for Westamerica Bank, it was her job to investigate suspicious activities and transactions that caused financial loss to the bank and truthfully report fraudulent transactions to law enforcement. Second, Cory had personal knowledge about the five counterfeit money orders that Defendant negotiated at the Westamerica Vallejo branch because she inspected them, gave their serial numbers to the U.S. Postal Service Money Order Verification Unit, and received confirmation from the Verification Unit that they were not valid. SW Aff. ¶¶ 6-7. While the U.S. Postal Service Money Order Verification Unit is not part of law enforcement, it is a component of the U.S. Postal Service, a federal government agency that may be presumed more reliable than most other categories of informant. *See*

1 generally *United States v. Kunkler*, 679 F.2d 187, 190 (9th Cir. 1982) (“Police officers are considered
 2 reliable and their reliability need not be independently demonstrated.”).

3 Furthermore, the affidavit established that Postal Inspectors Sherman and Singh corroborated
 4 some of the information provided by Cory and Day, including that the same individual who negotiated
 5 the five counterfeit orders at the Vallejo branch (according to Cory) also attempted to cash additional
 6 money orders at the Fairfield branch (according to Day) by reviewing the surveillance footage images
 7 from both banks. SW Aff. ¶ 8. Day also provided the individual’s bank account application
 8 information, and the postal inspectors confirmed the accuracy of the individual’s name and address
 9 through their own research and investigation. *Id.* ¶¶ 9-11. Accordingly, the magistrate judge could have
 10 reasonably credited Loss Investigator Cory’s and the U.S. Postal Service Money Order Verification
 11 Unit’s statements and relied on them to find probable cause.

12 **C. The Search Warrant Affidavit Established a Fair Probability that Evidence of
 13 Forgery and Possession of Stolen Property Would Be Located in the Residence,
 14 BMW and Other Vehicles, and Electronic Devices.**

15 Defendant does not meaningfully contest that the affidavit established probable cause to search
 16 his Residence, the BMW, and electronic devices, as further described in Attachment A to the warrant.
 17 His challenge is limited to item number 2 on Attachment A: any vehicles “parked at the premises” or
 18 “under the dominion and control of subjects encountered, which can be identified as being associated
 19 with this location, by keys, documents, statements or DMV records...” SW Attach. A. That challenge
 20 fails because Postal Inspector Singh’s affidavit provided sufficient facts to support a reasonable
 21 inference that evidence of forgery/counterfeiting or possession of stolen property would be found in any
 22 vehicle that had a significant nexus with the residence at 1001 Spyglass Parkway.

23 Direct evidence linking criminal objects to a particular site is not required for the issuance of a
 24 search warrant. *United States v. Poland*, 659 F.2d 884, 897 (9th Cir. 1981), cert. denied, 454 U.S. 1059
 25 (1981). A magistrate need only determine that “a fair probability exists of finding evidence, considering
 26 the type of crime, the nature of items sought, the suspect’s opportunity for concealment and normal
 27 inferences about where a criminal might hide stolen property.” *United States v. Holzman*, 871 F.2d
 28 1496, 1510–11 (9th Cir. 1989) (internal quotation marks and citations omitted), abrogated on other
 grounds by *Horton v. California*, 496 U.S. 128 (1990); see also *Carney*, 675 F.3d at 1013 (“a purveyor

1 of counterfeit bills of different denominations on different occasions may be expected to have evidence
 2 of that activity in his home.”); *United States v. Tate*, 586 F.3d 936, 943 (11th Cir. 2009) (“evidence that
 3 a defendant has stolen material which one normally would expect him to hide at his residence will
 4 support a search of the residence”); *United States v. Gunter*, 551 F.3d 472, 481 (6th Cir. 2009) (“[I]t was
 5 reasonable to infer that evidence of illegal activity would be found at Gunter’s residence.”).

6 Postal Inspector Singh’s affidavit contained several investigative facts that, taken together,
 7 revealed interweaving connections among the individual who held himself out as “Timothy Sears,” his
 8 residence at 1001 Spyglass Parkway, and any vehicles that he could use to drive between his residence
 9 and the banks at which he cashed counterfeit postal money orders. It stated that the individual who
 10 transacted the counterfeit postal money orders at Westamerica Bank submitted an account application
 11 with “1001 Spyglass Parkway, Vallejo, CA 94591” as his address. SW Aff. ¶ 9. Postal Inspector
 12 Sherman spoke with the property manager of the multi-unit apartment building, who confirmed that the
 13 individual who passed those counterfeit money orders resided at this address. *Id.* ¶ 10. He also
 14 researched postal indices and found that a “Timothy M. Sears” was receiving mail at this address. *Id.* ¶
 15 11. The BMW that the individual drove to leave Westamerica Bank after conducting the fraudulent
 16 transactions on November 14, 2019 was parked at this address. SW Attach A.

17 Just as someone who transacts counterfeit money on multiple occasions may be expected to keep
 18 additional counterfeit bills and equipment used to create those bills at his home, *see Carney*, 675 F.3d at
 19 1013, a thief may be expected to have stolen goods in his home, *see Tate*, 586 F.3d at 943, or a drug
 20 dealer may be expected to have evidence of drug activity in his home, *see Gunter*, 551 F.3d at 481, a
 21 magistrate judge could reasonably infer that someone who passes counterfeit postal money orders at
 22 banks would have evidence of his criminal activities, such as additional counterfeit money orders, postal
 23 money order stock, bank receipts, and identification documents, at his home, on his person, or in the cars
 24 that he drove to and from the banks where he cashed counterfeit money orders.

25 This inference is also supported by common sense. If “Timothy Sears” designed and printed the
 26 counterfeit money orders himself, he would most likely do this at home where he is likely to keep his
 27 computer, color printer, and other equipment used for counterfeiting. As the affidavit stated under the
 28 “Training and Experience” section, counterfeitors often use computers to design counterfeit money

1 orders and print them on modern color copiers and computer printers; these items are also the type that
 2 one would typically keep at home. SW Aff. ¶ 12(a). If “Timothy Sears” altered payment information
 3 on genuine money orders issued by the U.S. Postal Service that he stole or received from a third party
 4 who stole them, then it is also likely that he would keep the stolen property at his home. Under either
 5 scenario, he would likely carry the counterfeit money orders to the bank where he intended to cash them
 6 either on his person or in a car that he drove from his home to the bank.

7 Defendant cites *United States v. Becerril*, a case decided by Judge Hamilton in this district, in
 8 support of his argument. Mot. at 10. He includes a parenthetical that states, in sum and substance, that
 9 the affidavit established a nexus to the suspect’s vehicle where “the affiant offered expert opinion that
 10 mail thieves will generally store the stolen mail in their personal vehicles and/or at their residence, and
 11 that mail thieves commonly carry and transport the fruits and instrumentalities in their vehicles.” *Id.* By
 12 contrast, he argues, no probable cause existed to search the cars here because Postal Inspector Singh did
 13 not even claim that, in his training and experience, evidence or fruits of the alleged crimes are usually
 14 stored in the suspects’ cars. *Id.* But the parenthetical only tells half the story. The court also found that
 15 “this inference [that evidence of defendant’s mail theft would be found in his cars] is also supported by
 16 *common sense*, given that defendant would not likely store the stolen mail at his place of work, where he
 17 stole the Costco certificates in the first place.” No. 18-CR-00288-PJH, 2019 WL 162728, at *1 (N.D.
 18 Cal. Jan. 10, 2019) (emphasis added).

19 Accordingly, based on the facts contained in Postal Inspector Singh’s affidavit and common
 20 sense, a magistrate judge could reasonably infer that evidence of forgery and possession of stolen
 21 property would be found not only in the BMW, but “any vehicles” that “Timothy Sears” was likely to
 22 use to store and transport counterfeit money orders from his residence to the bank. Probable cause for
 23 the warrant thus extended so far as to cover any vehicles that had a sufficient nexus to the suspect’s
 24 residence at 1001 Spyglass Parkway. These included any vehicles “parked at the premises” or “under
 25 the dominion and control of subjects encountered” with the critical qualifier that they must be
 26 “associated with this location, by keys, documents, statements or DMV records.” *See Adjani*, 452 F.3d
 27 at 1146 (probable cause to search all computers found in suspect’s residence and to which he had
 28 apparent access, including one that he did not own, because “[t]he critical element in a reasonable search

1 is not that the owner of the property is suspected of crime but that there is reasonable cause to believe
 2 that the specific ‘things’ to be searched for and seized are located on the property to which entry is
 3 sought”) (internal quotation marks and citation omitted).

4 Finally, while the government disagrees with the factual and legal basis for the defendant’s
 5 argument and maintains that the affidavit established probable cause to search “any vehicles” as
 6 described in Attachment A, it has decided not to use the evidence seized from the Infiniti SUV if this
 7 case proceeds to trial. Therefore, defendant’s Fourth Amendment claim with respect to evidence seized
 8 from “any vehicle” other than the BMW is mooted. *See United States v. Kahre*, 737 F.3d 554 (9th Cir.
 9 2013) (district court correctly declined to address defendant’s claim that evidence was seized
 10 unlawfully, because prosecution never introduced the seized evidence, “thereby rendering the motion to
 11 suppress moot”); *United States v. Arias-Villanueva*, 998 F.2d 1491, 1502 (9th Cir. 1993) (holding that
 12 appeal of denial of a suppression motion is “moot because the government did not introduce any
 13 evidence seized during [the] search at trial”); *United States v. Tiem Trinh*, 665 F.3d 1, 17 (1st Cir. 2011)
 14 (“the record shows that no evidence concerning the leaf fragment was in fact introduced at trial, making
 15 any argument in favor of his motion to suppress . . . now moot”).

16 **II. The Warrant Described the Items to be Seized with Sufficient Particularity and Was Not
 17 Overbroad.**

18 To be valid under the Fourth Amendment, a search warrant must meet the requirements of
 19 particularity and breadth. The Ninth Circuit has defined particularity as “the requirement that the
 20 warrant must clearly state what is sought” and breadth as “the requirement that the scope of the warrant
 21 be limited by the probable cause on which the warrant is based.” *United States v. SDI Future Health,
 22 Inc.*, 568 F.3d 684, 702 (9th Cir. 2009) (quoting *In re Grand Jury Subpoenas Dated Dec. 10, 1987*, 926
 23 F.2d 847, 856–57 (9th Cir. 1991)).

24 Particularity means that “the warrant must make clear to the executing officer exactly what it is
 25 that he or she is authorized to search for and seize.” *Id.* at 702 (internal citation omitted). The
 26 description must be “specific enough to enable the person conducting the search reasonably to identify
 27 the things authorized to be seized.” *United States v. Spilotro*, 800 F.2d 959, 963 (9th Cir. 1986).
 28 “However, the level of detail necessary in a warrant is related to the particular circumstances and the

1 nature of the evidence sought.” *Adjani*, 452 F.3d at 1147. Indeed, “[w]arrants which describe generic
 2 categories of items are not necessarily invalid if a more precise description of the items subject to
 3 seizure is not possible.” *Spilotro*, 800 F.2d at 963.

4 A warrant must not only give clear instructions to a search team, it must also give legal, that is,
 5 not overbroad, instructions. Under the Fourth Amendment, this means that “there [must] be probable
 6 cause to seize the particular thing[s] named in the warrant.” *In re Grand Jury Subpoenas*, 926 F.2d at
 7 857. “The number of files that could be scrutinized … is not determinative. The search and seizure of
 8 large quantities of material is justified if the material is within the scope of the probable cause
 9 underlying the warrant.” *United States v. Hayes*, 794 F.2d 1348, 1355 (9th Cir. 1986).

10 In determining whether a warrant’s description of the items to be seized meets the Fourth
 11 Amendment requirements, the Ninth Circuit has focused on three questions: (1) whether probable cause
 12 exists to seize all items of a particular type described in the warrant; (2) whether the warrant sets out
 13 objective standards by which executing officers can differentiate items subject to seizure from those
 14 which are not; and (3) whether the government was able to describe the items more particularly in light
 15 of the information available to it at the time the warrant was issued. *Spilotro*, 800 F.2d at 963-64
 16 (internal citations omitted).

17 **A. The Electronics Provision was Sufficiently Particular and Not Overbroad.**

18 Defendant argues that the warrant’s electronics provision authorizing the seizure of any
 19 computers, cell phones, and electronic data storage devices “used in connection with identity theft and
 20 counterfeiting” lacked particularity because it provided no guidance to the executing officers on how to
 21 determine whether a device was used in connection with identity theft and counterfeiting. Mot. at 11.
 22 His argument fails because, based on the three *Spilotro* considerations, the provision was sufficiently
 23 specific to pass muster under the Fourth Amendment.

24 Starting with particularity, the warrant could not have described the computers, cell phones, and
 25 other electronic storage devices with greater precision given the early stage of the investigation. The
 26 affidavit included Postal Inspector’s expert opinions, based on his training and experience, about the
 27 common practices of counterfeiters and identity thieves (for example, “counterfeiters will often use
 28 computers or other electronic devices to design counterfeit Money Orders,” SW Aff. ¶ 12(a)). But

1 without knowing what kind of devices were used and how, the warrant could not describe in greater
 2 detail the devices to be seized. *See United States v. Lacy*, 119 F.3d 742, 746 (9th Cir. 1997) (warrant
 3 authorizing seizure of suspect's entire computer system was valid because, although government knew
 4 that suspect had downloaded child pornography, it did not know whether the images were stored on the
 5 hard drive or on one of many computer disks); *United States v. Hay*, 231 F.3d 630, 636-38 (9th Cir.
 6 2000) (warrant authorizing search and seizure of suspect's entire computer system and virtually every
 7 document in suspect's possession permitted because, although the government knew that 19 child
 8 pornography images had been sent to suspect's computer, it had no way of knowing where the images
 9 were stored).

10 Next, the warrant provided the postal inspectors who executed the warrant an objective standard
 11 by which to differentiate electronic devices subject to seizure from those which are not. In *Spilotro*, the
 12 court found a warrant failed to describe the items to be seized with sufficient particularity where it
 13 authorized the "wholesale seizure of entire categories of items not generally evidence of criminal
 14 activity," including "address books, notebooks, notes, documents, records, assets, photographs, and
 15 other items and paraphernalia" and "the only limit on the search and seizure was the requirement that the
 16 items seized be evidence of a violation of any one of thirteen statutes, some of exceptional scope." 800
 17 F.2d at 965. If further stated, in dicta, that "[r]eference to a specific illegal activity can, in appropriate
 18 cases, provide substantive guidance for the officer's exercise of discretion in executing the warrant." *Id.*
 19 at 959. For example, Courts have upheld warrants that identified the alleged criminal activities in
 20 connection with which the items were sought. *See United States v. Washington*, 782 F.2d 807, 818 (9th
 21 Cir. 1986) (search limited to items evidencing "involvement and control of prostitution activity" narrow
 22 enough to satisfy particularity requirement); *United States v. Hayes*, 794 F.2d 1348, 1356 (seizure
 23 limited to records related to distribution of controlled substances); *cf. United States v. Dennis*, 625 F.2d
 24 782, 792-93 (8th Cir. 1980) (warrant referring to extortionate credit transactions in addition to listing
 25 four federal statutes upheld).

26 Here, the officers who executed the warrant were limited in their search and seizure to electronic
 27 devices (including cell phones and computers and storage devices) that were "used in connection with
 28 identity theft and counterfeiting" within a specific three-month period. Instead of giving the officers

1 broad discretion to seize any electronics that were used to violate several California Penal Code Sections
 2 496(a) Possession of Stolen Property, 495 (Burglary), 530.5(a) (Identity Theft), 475(a) (Forgery), and
 3 182(a)(1) (Conspiracy), the warrant “more specifically identified the alleged criminal activities in
 4 connection with which the items were sought.” *See Spilotro*, 800 F.2d at 964. Accordingly, the
 5 warrant’s electronics provision more closely resembles the limiting language that the Ninth Circuit
 6 approved in *Hayes* (evidence of purchasing, dispensing, and prescribing of controlled substances), 794
 7 F.2d at 1356, than the general warrant authorizing the seizure of items “evidencing violations of the
 8 multiple statutes listed” that the Court invalidated in *Spilotro*, 800 F.2d at 964.

9 Furthermore, Postal Inspector Singh’s affidavit, which was attached to and incorporated by
 10 reference in the warrant, gave the executing officers additional guidance to distinguish between
 11 electronic devices used in connection with counterfeiting and identity theft and devices that are legally
 12 used. An affidavit may be relied on to provide the requisite particularity in an otherwise overbroad
 13 warrant “if (1) the affidavit accompanies the warrant, and (2) the warrant uses suitable words of
 14 reference which incorporate the affidavit therein.” *Hayes*, 794 F.2d at 1354 (quoting and citing *United*
 15 *State v. Hillyard*, 677 F.2d 1336, 1340 (9th Cir. 1982)). In addition, the “conclusions of the affiant
 16 based on experience and investigations may be considered.” *United States v. Crozier*, 777 F.2d 1376,
 17 1380 (9th Cir. 1985). Here, the executing officers knew from reading Singh’s affidavit that
 18 “counterfeeters will often use computers or other electronic devices to design counterfeit Money
 19 Orders,” SW Aff. ¶ 12(a), and that “it is common for individuals involved in...access device fraud and
 20 identity theft to use and maintain electronic devices.” *Id.* ¶ 12(d). The affidavit also contained detailed
 21 information about *how* individuals involved in access device fraud and identity theft use these devices in
 22 furtherance of these criminal activities:

23 These individuals use such devices to store information about their fraud
 24 and identity theft crimes...includ[ing] logs of fraudulent transaction
 25 history, records of funds seized, information regarding individuals and
 26 companies that have been victimized, records of payments from co-
 27 conspirator, and victim profiles. Such “profiles” contain the personal
 28 identifying information of victims, such as names, Social Security
 numbers, dates of birth, driver’s license or state identification numbers,
 alien registration number, passport numbers, and employer or taxpayer
 identification numbers.

1 SW Aff. ¶ 12(d). Where, as here, the attached and incorporated affidavit to a search warrant describes
 2 indicia or identifiable markers that “reasonably guide[d] the officers in avoiding the seizure of protected
 3 property, a search warrant authorizing such seizure is not a general warrant.” *Hayes*, 794 F.2d at 1356.

4 *United States v. Holzman* does not further Defendant’s argument. In that case, the Ninth Circuit
 5 rejected a search warrant authorizing the search for “any property or devices used or obtained through
 6 fraud operations.” 871 F.2d at 1509. This description failed the particularity requirement because it did
 7 not “limit the search to items readily identifiable with a particular transaction,” it did not provide “any
 8 other objective guidelines to limit the scope of the officers’ discretion,” and “*the necessary limitation*
 9 *similarly cannot be divined from the language of the preceding lines of the warrant.*” *Id.* at 1509-10
 10 (emphasis added). Whereas Postal Inspector Singh’s affidavit provided the necessary limiting language
 11 that allowed the executing officers to identify and seize only those electronic devices that were used “in
 12 connection with identity theft and counterfeiting,” there was no such language in the *Holzman* warrant
 13 or any attached and incorporated affidavit to limit the officers’ discretion in determining whether a
 14 property or device was obtained through a fraud operation.

15 Defendant’s overbreadth challenge to the electronics provision also falls flat. It cannot rely on
 16 *United States v. Lacy* and *United States v. Hay*, because in those cases, the Ninth Circuit upheld
 17 warrants that had equally, if not more expansive, language to describe the electronic devices to be
 18 seized. In *Lacy*, the warrant authorizing the seizure of “computer equipment and records” as well as
 19 “documents relating to BAMSE” was not overly broad because the affidavit established probable cause
 20 to believe that Lacy’s “entire computer was likely to evidence criminal activity” and “there was no way
 21 to specify what hardware and software had to be seized to retrieve the images accurately.” 119 F.3d at
 22 746-47. Likewise, the court in *Hay* approved a warrant that authorized the seizure of computer
 23 hardware, computer software, records stored in the form of electronic or magnetic coding or on
 24 computer media, and records “involved with child pornography” even though the computer and
 25 electronic storage provisions did not specifically mention child pornography because the preface
 26 “limit[ed] the scope of the search to materials which constitute evidence of the commission
 27 of...violations of [child sexual exploitation statutes].” 231 F.3d at 637. Furthermore, a more specific
 28

1 description of the computer equipment was not possible because the government had no way of knowing
 2 where the child pornography images were stored. *Id.*

3 The same analysis applies in this case. As already explained, Postal Inspector Singh's affidavit
 4 established probable cause that evidence of counterfeiting/forgery would be found on cell phones,
 5 computers, and electronic devices located at the apartment. The wording of the electronics provision in
 6 Attachment B limited the scope of the seizure to only those devices that were used in connection with
 7 specific criminal activities. Because law enforcement had no way of knowing in advance of the search
 8 where exactly the evidence would be located among the electronic devices, the scope of the seizure had
 9 to include "internal or external hard drives, removable hard drives, removable storage devices...compact
 10 disks...media players with storage capabilities..." and "all user created files, including but not limited to
 11 audio, video, voicemail..." SW Attach B, Items 11 and 12. *See Adjani*, 452 F.3d at 1149-50 ("the
 12 warrant arguably might have provided for a less invasive search of Adjani's [email] 'inbox' and 'outbox'
 13 ... as opposed to the wholesale search of the contents of all emails ...[but] [a]voiding that kind of
 14 specificity and limitation was not unreasonable ... To require such a pinpointed computer search,
 15 restricting the search to an email program or to specific search terms, would likely have failed to cast a
 16 sufficiently wide net to capture the evidence sought").

17 **B. The Counterfeit Money Orders Provision was Sufficiently Particular.**

18 Defendant's complaint that the warrant failed to define the terms "counterfeit" money orders and
 19 "Postal money order stock" is meritless. If store managers and ordinary citizens can identify counterfeit
 20 bills, *see Carney*, 675 F.3d at 1008, store clerks can identify counterfeit Western Union money orders,
 21 *Duegaw*, 150 F. App'x at 803-04, and bank loss investigators can identify counterfeit postal money
 22 orders, SW Aff. ¶ 6, it stands to reason that postal inspectors executing the search warrant could
 23 differentiate between counterfeit postal money orders and genuine postal money orders. The affidavit
 24 did not include instructions on how to identify "counterfeit" money orders and money order stock
 25 because they were unnecessary, and the absence of those instructions does not render the warrant
 26 insufficiently particular.

1 **III. Suppression is Unwarranted Because the Government's Search Was Conducted in Good**
 2 **Faith.**

3 Even if the Court holds that there was a Fourth Amendment violation in this case, suppression is
 4 not warranted because Postal Inspector Singh relied on a validly issued search warrant in good faith. As
 5 the Supreme Court found in *United States v. Leon*, the marginal or nonexistent benefits produced by
 6 suppressing evidence obtained in objectively reasonable reliance on a subsequently invalidated search
 7 warrant cannot justify the substantial costs of exclusion. 468 U.S. 897, 922 (1984). Unless a
 8 “reasonably well trained officer would have known that the search was illegal in light of all of the
 9 circumstances,” the fruits of an illegal search should not be suppressed. *Herring v. United States*, 555
 10 U.S. 135, 145 (2009) (quoting *Leon*, 468 U.S. at 922 n.23) (internal quotation marks omitted). It “is the
 11 magistrate’s responsibility to determine whether the officer’s allegations establish probable cause and, if
 12 so, to issue a warrant comporting in form with the requirements of the Fourth Amendment. In the
 13 ordinary case, an officer cannot be expected to question the magistrate’s probable-cause determination
 14 or his judgment that the form of the warrant is technically sufficient,” *Leon*, 468 U.S. at 921, and
 15 “suppression of evidence is not an appropriate remedy where an officer executes a warrant he
 16 reasonably believed to be valid.” *United States v. Meek*, 366 F.3d 705, 714 (9th Cir. 2004) (citing
 17 *Illinois v. Krull*, 480 U.S. 340, 349–50 (1987)).

18 The Court in *Leon* identified four situations that *per se* fail to satisfy the good faith exception.
 19 468 U.S. at 922-23. None of those situations apply here. First, Postal Inspector Singh did not mislead
 20 the California Superior Court judge who issued the warrant, the Honorable Tim Kam, by making a false
 21 statement or recklessly disregarding the truth in making a statement. Defendant makes no allegation of
 22 such misconduct. Second, there is no claim, let alone evidence to suggest, that Judge Kam wholly
 23 abandoned his judicial role in approving the warrant, acting only as a “rubber stamp” to the warrant
 24 application rather than as a neutral and detached official.

25 Third, the warrant was not so “facially deficient” in detail as to the place to be searched or the
 26 things to be found that the officers could not reasonably presume it to be valid. *Id.* at 923. As argued
 27 above, the warrant limited the officers’ exercise of discretion even when it authorized the search and
 28 seizure of the broadest categories of items, such as the “any vehicles” provision and the electronic

1 devices provision, by reference to specific illegal activities (counterfeiting and identity theft) and a
 2 three-month time period. *Compare United States v. Kow*, 58 F.3d 423, 427 (9th Cir. 1995) (officers
 3 could not reasonably have relied on a warrant that authorized seizure of essentially all of corporation's
 4 business documents and records and none of the categories of seizable documents was limited by
 5 reference to any alleged criminal activity).

6 Fourth, the affidavit upon which the warrant was based was not so "bare bones" or "lacking in
 7 indicia of probable cause" that no reasonable officer could rely upon it in good faith. *Leon*, 468 U.S. at
 8 923, 926. In *Underwood*, the only information provided to suggest that drug trafficking evidence would
 9 be found at Underwood's home was that law enforcement had observed "a baggie of a personal-use
 10 amount of marijuana" in his home and observed him deliver two wooden crates on one occasion three
 11 months before the warrant application. 725 F.3d at 1082–83. There is a stark difference between such
 12 bare factual assertions and the detailed information that Postal Inspector Singh provided in his affidavit.

13 Finally, suppression is an unfairly harsh remedy in a scenario where government agents did
 14 nothing wrong. "To trigger the exclusionary rule, police conduct must be sufficiently deliberate that
 15 exclusion can meaningfully deter it, and sufficiently culpable that such deterrence is worth the price paid
 16 by the justice system." *Herring*, 555 U.S. at 144. Postal Inspector Singh's affidavit reflected diligent
 17 investigation, including conversations with bank loss investigators, surveillance, and research. Even if
 18 the Court ultimately agrees with some of the Defendant's objections, not one of them is glaring or overt,
 19 or suggests anything approaching misconduct. Suppression of this evidence, therefore, would not
 20 "meaningfully deter" agents engaged in similar investigations.

21 CONCLUSION

22 For the reasons set forth above, the United States respectfully requests that the Court deny
 23 Defendant's motion in its entirety.

24 DATED: December 8, 2021

25 Respectfully submitted,

26 STEPHANIE M. HINDS
 27 Acting United States Attorney

28 /s/ Yoosun Koh
 YOOSUN KOH
 Assistant United States Attorney
